PATENT NO. 373471.

GENERAL INFORMATION:
APPLICANT: DILLNER, JOAKIM
APPLICANT: DILLNER, LENA
APPLICANT: CHENG, HWEE-MING
TITLE OF INVENTION: SYNTHETIC PEPTIDES OF HUMAN
TITLE OF INVENTION: PAPILLOMAVIRUS 1, 5, 6, 8,
TITLE OF INVENTION: USEFUL IN IMMUNOASSAY FOR
TITLE OF INVENTION: DIAGNOSTIC PURPOSES
TITLE OF SEQUENCES: 193
                                                                                                                                                                                                                                                                                            COUNTRY: U.S.A.

GENERAL INFORMATION:

```
Sequence 1, Application US/09367309A

Patent No. 6428807

Patent No. 6428807

Patent INFORMATION:

APPLICANT: MALLIAROS, JIM

APPLICANT: MALLIAROS, JIM

APPLICANT: MALLIAROS, JIM

TITLE OF INVENTION: CHELATING IMMUNOSTIMULATING COMPLEXES

FILE REFERENCE: 01727/0149

FURIAR REPERENCE: 01727/0149

CURRENT APPLICATION NUMBER: US/09/367,309A

CURRENT FILING DATE: 1999-08-11

PRIOR APPLICATION NUMBER: ECT/AU98/00080

PRIOR APPLICATION NUMBER: AU PO 5178

PRIOR APPLICATION NUMBER: AU PO 5178
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     APPLICANT: EDWARDS, Stirling John

Application US/09149476

Sequence 640, Application US/09149476
Patent No. 6420526
GENERAL INFORMATION:
APPLICANT: Rosen et al.
TITLE OF INVENTION: 186 Human Secreted proteins
FILE REFERENCE: PZ002P1
CURRENT APPLICATION NUMBER: US/09/149,476
CURRENT FILING DATE: 1998-09-08
EARLIER APPLICATION NUMBER: PCT/US98/04493
